As an Information Technology student at Politeknik Negeri Malang, I am passionate about building creative and user-centered digital experiences through Front-End Development and UI Design. With a strong foundation in HTML, CSS, and JavaScript, I have practical experience using modern frameworks such as Laravel, React, Bootstrap, and Tailwind CSS to develop responsive and visually appealing web interfaces. I am detail-oriented, quick to adapt, and eager to continuously learn emerging technologies to improve both design and functionality. Driven by curiosity and innovation, I aim to contribute to a forward-thinking team where I can apply my design sense and technical expertise to create meaningful digital solutions.

## WORK EXPERIENCE

### Oranji Studio - Part Time (May 2024 - Present)

Digital Designer - Malang, Indonesia

- Designing digital assets such as social media content, promotional materials, and brand visuals based on client and team requirement using Figma and Inkscape.
- Collaborating with marketing and creative teams to ensure consistency with brand identity and project goals with Notion and FigJam.
- Managing multiple design projects simultaneously while meeting deadlines and maintaining high visual standards.

## PROJECTS

### K3 Siantar Top - Politeknik Negeri Malang (Sep 2025 - Present)

Front-End Developer

- Developing a landing page web-based application project for **K3 (Keselamatan dan Kesehatan Kerja)** for PT Siantar Top. The project aims to digitalize safety reporting and monitoring processes within the company's production environment, focusing on usability and efficiency of data management.

**TechStack:** React.js, HTML, CSS, JavaScript, Tailwind CSS, Git

### Sistem Informasi Pendaftaran & Integrasi TOEIC Polinema (SIPINTA) - Politeknik Negeri Malang (Mar 2025 - Jun 2025)

Project Manager, Full-Stack Developer, and UI/UX Designer

- Developing a web-based system designed to simplify the **TOEIC registration process** for Polinema students while integrating user access across the entire academic community. The system supports efficient data management, automated verification, and a user-friendly interface to enhance accessibility for students, lecture, and administrators.

**TechStack:** Figma, Laravel, MySQL, HTML, CSS, JavaScript, Bootstrap, Tailwind.css, Git

### Oranji Studio X HMTI - Oranji Studio (Mar 2025 - Jun 2025)

Graphic Designer

- Collaboration between Oranji Studio and the Information Technology Student Association (HMTI) to design and develop **HMTI merchandise products**, including T-shirts, keychains, lanyards, and stickers.

**TechStack:** Figma, Inkscape

## Sistem Informasi Tata Tertib - Politeknik Negeri Malang (Sep 2024 - Des 2024)

UI/UX Designer and Front-End Developer

- Developing a digital platform designed to simplify and improve **campus regulation management**. The system allows students, lecturers, and staff to access disciplinary information quickly and transparently. It integrates reporting and documentation processes into one system, provides real-time access for violation management, and enhances administrative efficiency within the campus environment.

**TechStack:** Figma, HTML, CSS, Javascript, Git

## Sistem Ekspedisi - Politeknik Negeri Malang (Sep 2023 - Des 2023)

UI/UX Designer and Front-End Developer

- Developing a Java-based **expedition management system** operated via terminal to simulate the workflow of delivery services in Indonesia. The system manages data related to shipment registration, package tracking, and delivery status updates, aiming to improve efficiency and accuracy in logistics data processing.

**TechStack:** Java, Git
